

# / DevOps Architect

## / Evens SOLIGNAC

*Aspiring CTO with DevOps expertise and leadership experience, passionate about technology strategy, innovation, and building scalable infrastructure to support business growth.*

## —\ Functions

### 2022 – Pres. **Besedo — Lead DevOps engineer**

Leadership and mentoring skills to guide and support the DevOps team.

*Transition from managing IT operations alone to building and supervising a dedicated team.*

*Recruitment, training and supervision of 4 employees, promoting team growth and knowledge sharing.*

Cost optimization initiatives

*Led and implemented strategic cost optimization actions, reducing operational expenses.*

### 2019 – 2021 **Besedo — DevOps engineer**

Designing, maintaining, optimizing, and ensuring high availability of high-traffic infrastructures (~500rq/s).

*Responsible for the design, deployment and optimization of 3 infrastructures.*

Supporting development and data science teams.

Developed and monitored incident response plans, actively participated in incident resolution.

Expertise in defining and managing infrastructure using Infrastructure as Code (IaC) principles.

*Implementing automation and industrialization techniques for services.*

*Managing deployments/development (software, microservices, machine learning services).*

*Continuously improving and optimizing existing processes and systems (efficiency and reliability).*

### 2016 – Pres. **Freelance DevOps Architect**

Design and deployment of infrastructures.

*Projects: Nostrum Care, Ma Web Mutuelle*

IT audit and consulting.

Deployment, management, and maintenance of IAAS.

### 2015 – 2018 **Epiconcept — Linux System network administrator**

Administration of production systems and networks.

Management of the IT infrastructure for ~70 employees.

Deployment, management, and maintenance of virtualization systems.

Orchestration and deployment of services and software.

Maintenance of proprietary network equipment.

## —\ Formation

### 2018 **Master degree (RNCP1) — ESTIAM Digital Médias**

Architecture of media solutions for content delivery

Training partnership at the National Audiovisual Institute - France (INA)
